

Attachments for SVE Truck

Svetruck started in 1977, designing a service friendly, durable and reliable forklift. When they started that year the company had a clear vision of the kind of business they would like to be and the types of products they would like to create. Svetruck specializes in producing lift trucks which enable the operator to be able to work effectively within difficult surroundings. Svetruck believes that being capable of executing successful and safe material handling in the best possible way helps to contribute to a positive work atmosphere.

Home to their manufacturing facility in Ljungby, they create machines like container handlers, forklifts and log-stackers. To this day Svetruck is proudly supplying lift trucks and different forklifts to all their international customers.

Focused on the future, Svetruck remains fully devoted to maintaining their outstanding reputation of makers of durable and reliable forklifts. Their basic method to solid experience, high quality and over 30 years of knowledge in the area, means they can provide people excellent solutions for all of their material handling needs.
